

MOREL

BREEDING FOR A BETTER WORLD

NEW VARIETIES 2024-25

WE'RE CREATING MORE THAN A TREND,
IT'S A NEW WAY OF LIFE... ..

DISCOVER OUR NEW RANGE OF BOTANICAL CYCLAMEN!

2023 represented a major milestone: the acquisition of Kwekerij Koen, adding Mr Koen's unique selections to our cyclamen range, including various botanical cyclamen species such as *Cyclamen coum* and *Cyclamen hederifolium*, which are now featured in this catalogue.

This strategic expansion into new species, which has long been the focus of our research ambitions, opens up new prospects for the use of cyclamen outdoors including gardens, flowerbeds and undergrowth, but also in planter boxes on terraces. We are proud to offer you a selection of hardy, frost-resistant cyclamen species, perfectly in line with our commitment to social and environmental responsibility, favouring sustainable products that reduce water and fertiliser consumption.

Among the 10 new *Cyclamen persicum* varieties featured in this special 2024-25 catalogue, this year's flagship innovation, the double-flower PETIT MOULIN®, perfectly illustrates the changes in our selection: a long-lasting hybrid that's easy to grow and maintain, offering spectacular flowering for over 100 days with minimum care. PETIT MOULIN® grew from an agreement with Mr Kobayashi of Hirohara Flower Farm.

This year, our commitment to sustainability is stronger than ever. Morel is striving to become an even more responsible company by taking concrete actions to reduce its footprint. Our seed supplier SCEA de Montourey has recently been certified as Plante Bleue Level 3, recognition aimed at the consumer. It is partially equivalent to our MPS A+ certification in relation to good environmental and social practices and actions promoting biodiversity.

Now, go ahead and discover all of our new varieties for the coming season on the following pages.

We want to assure you that our technical team is always listening to your needs and providing the best possible support. On behalf of the entire team, I would like to express our gratitude for your loyalty and trust.

List of varieties

OUR VALUES

"Breeding for a better World."

INNOVATE PERMANENTLY AND CONTINUOUSLY

Our standard ranges are constantly evolving to adapt to different markets and climates. As trend-setters, we also offer a range of original and previously-unseen varietal innovations. For example, our INDIKA® range, launched in 2018, has established itself as the benchmark for two-tone cyclamen.

PERFORM WITH SUPERIOR QUALITY

Quality and reliability are our top priorities. That's why we take special care over the traceability of our batches, ensuring 100% tracking. Furthermore, our customer satisfaction rating is 98%, and our average germination rate remains high at 85%.

EXCEL IN MAXI FLOWERS

Our current range of MAXI flower *Cyclamen persicum* is the richest and most extensive on the world market. It's the fruit of over 100 years of genetic heritage and rigorous selection for large flowers.

ADAPT TO CLIMATIC CONDITIONS

Our range of varieties, tested and approved under northern and southern climatic conditions, includes 6 series and 32 solutions tailored to the needs of your production area. With 70 years' experience selecting our cyclamen in the South, we guarantee excellent heat tolerance and adaptation to unexpected hot spells associated with climate change.

SUPPORT ALL OUR CUSTOMERS

Our average customer relationship lasts 30 years, reflecting our commitment to your loyalty and satisfaction. Today, our team of 10 sales staff and technicians is dedicated to assisting you choose your varieties and providing support throughout the growing process.

DEVELOP GARDEN USES

Our *Cyclamen persicum* varieties are tested outdoors: we now have 71 varieties approved as OUTstanding Cyclamen®, the labelling scheme for a selection of the best outdoor cyclamen varieties. This year we're offering new garden uses by introducing perennial cyclamen varieties such as *Cyclamen coum* and *Cyclamen hederifolium*.

BE COMMITTED SOCIALY AND ENVIRONMENTALLY

Our passion for plants drives our commitment to a more responsible world, as evidenced by our recent Plante Bleue Level 3 certification. We also promote a long-term corporate culture through mobility agreements, training programmes and career development opportunities for our staff members.

DIVERSIFICATION

MOREL ACQUIRES HARDY CYCLAMEN SPECIALIST

The recent acquisition of Kwekerij Koen has enabled us to take our approach to creating varieties a step further, developing new cyclamen varieties that are more resilient to extreme climatic conditions, while being more economical in terms of water and fertiliser use throughout their production cycle.

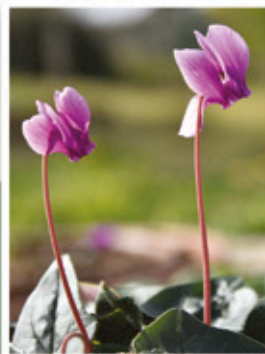

Based in the Netherlands, founded over 50 years ago by Mr Aad Koen and devotedly managed by himself, Kwekerij Koen is distinguished for its expertise in selecting nearly twenty species of botanical cyclamen, including *C. hederifolium* and *C. coum*, now added to our catalogue.

With a century of experience in plant breeding and seed production, we share many things in common with Kwekerij Koen, including a family history and a passion for cyclamen. This collaboration will enable us to expand our range, but also to acquire other selected species such as Tulbaghia, Nerines and Helleborus. It opens up a promising avenue for continuous innovation and realising our shared vision: to offer superior quality products, adapted to our customers' many uses while also preserving the environment.

PETIT MOULIN®

DOUBLE FLOWERS FOR 100 DAYS!

We are delighted to present PETIT MOULIN®, the result of a fruitful collaboration with the Japanese company Hirohara Flower Farm. This new variety embodies the culmination of our commitment to extend our gene pool and expanding our cyclamen range.

Hirohara Flower Farm began producing potted plants and cut flowers in 1964. Founded on the trust placed in us by Mr Kobayashi Yoshitaka and son Kei, we were privileged to work with one of their double-flowered population varieties, renowned for its remarkably long flowering period. The Japanese company began breeding this new double-flower types more than 20 years ago and, through the discovery of a genetic mutation in traditional varieties, developed the emblematic "Green Tiara" and "Screwstar" varieties. These new double-flower types bring a novel vision for cyclamen, setting them apart from traditionally "centred" varieties.

By developing a meticulous selection process, we have succeeded in combining the unique characteristics of Mr Kobayashi's double-flowered selections with our Morel lines.

PETIT MOULIN®, a robust and prolifically flowering F1 hybrid variety, is the result of these years of work. It has an exceptionally long flowering period of over 100 days, well above average. This flower's longevity is due particularly to its lower pollen content, which explains its remarkable outdoor performance.

DOUBLE FLOWERS FOR 100 DAYS!

DOUBLE FLOWERS, TWICE AS LONG!
AN ASTONISHINGLY
LONG FLOWERING PERIOD!

Petit Moulin® is an innovative and long-lasting new type of double-flower *Cyclamen persicum*. Its double flowers are perfect for indoors, but especially for natural outdoor arrangements. When in bloom, the flowers spread out naturally around the circumference of the plant. You'll be enchanted by the quantity and exceptional longevity of its blooms – over 100 days for one flower!

CHARACTERISTICS :

- Original and unique shape
- Longer-lasting double flowers (less likely to be pollinated)
- Prolific flowering and excellent habit for terraces and patios
- Marketing tools designed on request
- Available in a mix including several shades of white with eye, lilac with eye and pink with eye
- Shades of salmon and magenta may be present in the mix
- Can be grown easily in 15 cm pots with 2 seedling plugs
- Crop time from sowing: 32–34 weeks

For decades and thanks to its genetic heritage, Morel offers the widest choice of large-flower reds on the market.

Allegro, the latest addition, was created to meet the need for a supply of red cyclamen for late-season cultivation. Its deep red petals adorn a beautiful, generously sized plant. The uniformity of the plants means unrivalled crop density and regularity.

CHARACTERISTICS:

- Remarkable bright red colour
- Large flower, intense, long-lasting colour
- Round plant combined with tight-knit foliage
- Low sensitivity to flower tip burn
- Crop time from sowing:
34-35 weeks

OUTstanding CYCLAMEN®

THE BEST MOREL VARIETIES FOR OUTDOORS

Every year, we offer you a refreshed list of *Cyclamen persicum* varieties validated by OUTstanding Cyclamen®, our label for a selection of the best outdoor hybrids. It ensures long-lasting flowers in gardens, on balconies and terraces.

Our varieties are repeatedly and thoroughly tested against several criteria. Over a set period, we assess, among other things, the average number of flowers per plant, the quality and strength of the foliage, uniformity among the plants and the uniformity of the bowl.

This year, PETIT MOULIN®, with its exceptional outdoor performance, and Metis® Light rose have been added to our range of outdoor cyclamen.

LIST OF OUTstanding CYCLAMEN® VARIETIES :

OTHER OUTDOOR USES? CHOOSE HARDY CYCLAMEN!

For a variety of outdoor uses, such as path edges, under trees or in rocky areas, choose our new range of hardy cyclamen: *Cyclamen coum* and *Cyclamen hederifolium*.

The ADVANTAGE of botanicals: they are tuberous perennials, with pretty little flowers that will appear and re-flowering at the same time every year. Hardier than *C. Persicum*, they are frost-resistant.

Their varied foliage and natural shades of flower colours will create delightful carpets of flowers over the years, requiring no maintenance. Don't wait any longer, explore our perennial range on the next page!

NEW OFFER PERENNIAL CYCLAMEN!

Discover our *Cyclamen coum* and *Cyclamen hederifolium* series with their choice of separate colours and varied foliage.

CYCLAMEN COUM

- LIGHT PINK
- WHITE
- PINK

- Hardy Mini cyclamen, cold-resistant (-20°C / -4°F)
- Round foliage: green, marbled, silver-leaf, Christmas tree
- To be planned for winter-spring flowering
- Plant width: 10-15 cm / 4 to 6 inches
- Plant height: 10-15 cm / 4 to 6 inches

CYCLAMEN HEDERIFOLIUM

- PINK
- WHITE

- Hardy Mini cyclamen, cold-resistant (-15°C / 5°F)
- To be planned for autumn flowering
- Plant width: 15-20 cm / 6 to 8 inches
- Plant height: 10-15 cm / 4 to 6 inches

Perennial cyclamen reproduce and quickly form flowering carpets. *Cyclamen hederifolium* flowers from August to October. *Cyclamen coum* flowers from February to April. A good idea: plant a mixture of *Cyclamen hederifolium* and *Cyclamen coum* for double flowering in spring and autumn!
