

All the fancy types in the MOREL MINI series

**Smartiz® VICTORIA and Metis® VICTORIA:
The 100% crowned Minis**

The Smartiz® and Metis® series both enable you to grow 100% VICTORIA.

Whether it be in Northern or Southern climate types, Smartiz® VICTORIA provides good results in a 3.5” pot and 4” pot in summer. Metis® is highly recommended for autumn in a 5” or even a 4” pot.

MINI FLOWER	Pot Ø in.	SOUTH				NORTH				Advised ADT ^(a) at flowering stage in greenhouse	Plants /yard²	Culture time from sowing
												
SMARTIZ® VICTORIA	2.5”									54°-59° F	42	27 ~ 28 weeks
	3.5”									59°-68° F	34	
	4”									68° - 77° F and +	25	
METIS® VICTORIA	3.5”									54°-59° F	25	28 ~ 30 weeks
	4”									59°-68° F	21	
	5”									68° - 77° F and +	17	

As the days get shorter, it’s natural to see the “Victoria” characteristic of the flower diminish. The ORIGAMI® variety is a solution for late programs: its very pronounced characteristic enables it to keep its “crown” on the petals even when the days are short. On the Metis® VICTORIA and Smartiz® VICTORIA, it is recommended to use some growth regulator during the growing stage to keep them compact.

**Metis® SILVERLEAF and Metis® PomPom®,
More and more fancy types!**

Metis® SILVERLEAF (DECORA)

- Excellent autumn and winter growth results.
- Decorative foliage with eye-catching contrasts.
- In summer, recommended in a 5” pot to optimize a nice balance “pot/canopy”.

Metis® PomPom®

- Best results in autumn and winter in northern regions in a 4” pot.
- Original and compact plant with fringed flowers and lightly crenated small leaves.

MINI FLOWER	Pot Ø in.	SOUTH				NORTH				Advised ADT ^(a) at flowering stage in greenhouse	Plants /yard²	Culture time from sowing
												
METIS® SILVERLEAF (DECORA)	3.5”								(b)	54°-59° F	25	29 ~ 31 weeks
	4”									59°-68° F	21	
	5”									68° - 77° F and +	17	
METIS® POMPOM®	3.5”								(b)	54°-59° F	25	30 ~ 32 weeks
	4”									59°-68° F	21	
	5”									68° - 77° F and +	17	

(a): ADT - Average Daily Temperature

(b): NB: for springtime flowering, additional artificial lighting may be required during vegetative/ growing stage.

The perfect schedule for the 3 MINI FANTASIA® varieties:

Smartiz® FANTASIA®
Metis® FANTASIA®
Metis® FANTASIA® Winter

Morel has brought you an extensive range of solutions so you can schedule the MINI FANTASIA® Cyclamen for the entire season or even the entire year.

It also meets demand for the MINI FANTASIA® in different pot sizes:

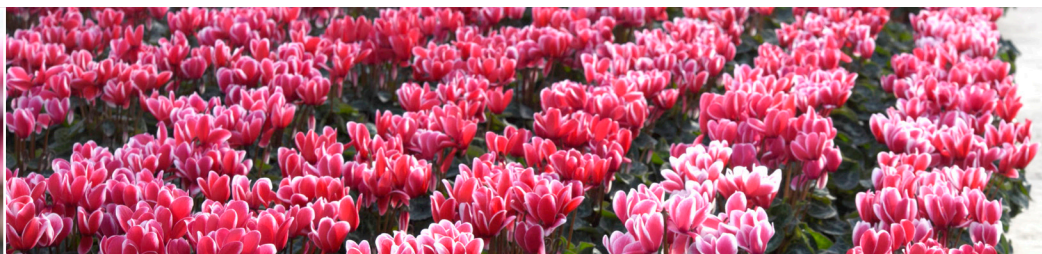

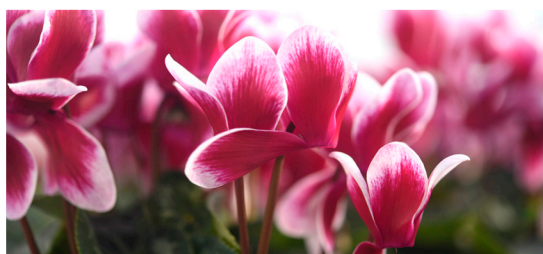

- Smartiz® FANTASIA® great results as a micro, even in summer.
- Metis® FANTASIA® in several pot sizes for autumn.
- Metis® FANTASIA® Winter for winter and spring in a 4" pot.

MINI FLOWER	Pot Ø in.	South				North				Advised ADT ^(a) at flowering stage in greenhouse	Plants /yard ²	Culture time from sowing
												
SMARTIZ® FANTASIA®	2.5"									54°-59° F	46	29 ~ 31 weeks
	3.5"									59°-68° F	38	
	4"									68° - 77° F and +	30	
METIS® FANTASIA® 	2.5"								(b)	54°-59° F	42	30 ~ 32 weeks
	3.5"									59°-68° F	34	
	4"									68° - 77° F and +	25	
METIS® FANTASIA® WINTER 	4"								(b)	54°-59° F	21	30 ~ 32 weeks
	5"									59°-68° F	17	

The ADVANTAGES of the MINI FANTASIA® :

- Even in poor weather conditions, the MINI FANTASIA® is highly resistant to botrytis and its flowers display incredible longevity.
- Metis® FANTASIA® Winter stands out for its spectacular and synchronized blossom in 4 colors. A variety that is very consistent and vigorous even in dark and cold conditions.
- All the METIS® FANTASIA® varieties are recognized as OUTstanding®. This is The LABEL for the best outdoor varieties.
