12° ~ 15° C

Cold culture conditions to obtain plants of small volume or to reduce the transpiration of the plants of big volume. Be careful of humidity. These temperatures require varieties with low sensitivity to Botrytis.

15° ~ 20° C

Cool culture conditions, ideal for most of the varieties.

20° ~ 25° C and +

Warm culture conditions to obtain plants with a larger volume than normal, with high performance during culture and at the consumer's.
